

**ANNOTATION**  
**of report on a pre-diploma practice of a 4th year student, of group BT-21**  
**direction of training 7.05140101 - Industrial Biotechnology**  
**Kozhemiakina Alexandra**  
**The theme: “The technology of production of a solution for infusion**  
**“Tsyprofarm””**

A report on a pre-diploma practice contains 27 pages of printed text. The report consists of an introduction, three chapters, conclusions, a list of references. It has two formulas and one table.

The report of the pre-diploma practice describes the production of a solution for infusion called "Tsyprofarm".

It is reviewed a topicality of the theme, that was chosen, a purpose of a pre-diploma practice and its tasks.

The first part of the report is devoted to historical information about the company “Farmak”.

The second part shows the technology of production of the drug. This part includes such subsections: The characterization of the product, The technological scheme of production, The description of technological process, Methods of quality control.

It is presented accidental prevention and the protection of labor in the company “Farmak” in the third part of the report.

Applications contain the hardware scheme of the product.

As a result of a pre-diploma practice such tasks have been solved: the practice helped not only to obsess theoretical knowledge in pharmacy and microbiology, but also to familiarize with the particular qualities of the equipment, the production and preparation stages and helped to gain theoretical knowledge in servicing of the equipment etc.

According to the results of the finishing of the pre-diploma practice such conclusions were made: I have learned the company as an independent production and operation unity; I have strengthened and deepened the knowledge of theoretical subjects and expanded my practical experience; I also have learned modern technologies and equipment of the production and gained the experience of work organization in the company and working with people.
