

**ANNOTATION of report on a pre-diploma practice of a 4th year student, of group BT-21  
direction of training 7.05140101 - Industrial Biotechnology**

**Reshetilo Ivan**

**The theme: “The technology of production of a solution for infusion “Oflobac””**

Report of a pre-diploma practice contains 36 pages of printed text. The report consists of an introduction, eight chapters, conclusions, list of references and applications.

The report of the pre-diploma practice describes the production of tablets "Oflobak."

The introduction reviews the common information PTC "Kyivmedpreparat."

The main part of the report is devoted to historical information of PTC "Kyivmedpreparat", drug production technology, production control, engineering and labor safety at PTC "Kyivmedpreparat", technological instructions and environmental protection.

Appendix contains technological and process scheme of the drug "Oflobak."

As a result of pre-diploma practice next tasks have been solved: the practice helped not only to obtain theoretical knowledge in pharmacy, but also to familiarize with the particular qualities of the equipment, the production and preparation stages and helped to gain theoretical knowledge in servicing of the equipment etc.

According to the results of the pre-diploma practice such conclusions were made: I have learned the company as an independent production unit, I have strengthened and deepened the knowledge of theoretical subjects and expanded my practical experience; I also have learned modern technologies and equipment of the production.
