“Production of vaccine Polimun IBD”

Report on a pre-diploma practice contains 26 pages of printed text. The report consists of an introduction, six chapters, conclusions, appendix, list of sources and contains 6 pictures.

The report describes the production of veterinary vaccines. Introduction contains the relevance of the chosen research topic, the purpose of pre-diploma practice and describes its problems. The first part of the report is devoted to characteristics of the company. The second section provides requirements for buildings and clothing. In the third part the general data about vaccines are adduced. In the fourth part of the report the basic process of vaccine production is detailed. The fifth section is devoted to quality control and the sixth - to the results of monitoring.

In the appendix technological and hardware circuits vaccine production are presented.

As a result of pre-diploma practice have been resolved following tasks: describing facilities and personnel, representing the basic production process of POLIMUN IBD vaccine, carrying out quality control and so on. As a result of pre-diploma practice made the following conclusions: the production of vaccines is a complex process and requires control at every stage.
